Hafetz and Associates Leads in Technology: HR Benefits Tech

Linwood, NJ – October 11, 2019 – Hafetz and Associates offers leading technology, HR Benefits Tech and the best benefits technology solutions to give their clients a competitive edge.

HR Benefits Tech provides automation, so clients feel confident knowing that the benefits election process is completed accurately, in less time, with less effort. Hafetz and Associates provides the best for its clients by using two platforms; Ease and Employee Navigator.

“These platforms aim at making the selection process easier for companies large and small; simplifying and streamlining the administration of their clients’ benefits with efficiency, effectiveness, and innovation,” explained Scott Hafetz, president of Hafetz and Associates.

Ease:

Ease is an online benefits enrollment platform powered by brokers and integrated with other HR technology solutions; making the benefits election easier for companies and its employees. Ease eliminates paper forms, provides side-by-side plan comparisons, uses e-signatures and accesses real-time updates during open enrollment. Employers can also create and send offer letters, complete and e-sign W-4 and I-9 forms, and collect direct deposit information.

Employee Navigator:

Employee Navigator is a benefits HR and compliance software for brokers and their clients, providing a solution to manage everything from benefits administration to onboarding and PTO and vacation tracking to make running a business easier. Employee Navigator allows companies and agencies to extend the use of the application and for them to integrate other systems and access them all through one platform.
